SUMMARY:

MERN stack software developer with expertise in front-end and back-end development, experienced in working with real world projects.

TECHNICAL SKILLS:

- **Frontend** - JavaScript, React JS, HTML, CSS
- **Backend** - Node.js, Express.js
- **Database** - MongoDB
- **Others** - Git, GitHub, C, Java

PROJECTS:

[LINK] **Text.dev - Password generator & text manipulation web app**
 Tech Stack: React JS, CSS, Bootstrap 5
- First React JS project that is useful in many aspects. I personally use this application for generating secure passwords that can be copied in just one click. This tool also helps manipulate texts and fixes unwanted spaces.

[LINK] **TheRealNews - News headline in a glance**
 Tech Stack: React JS, CSS, Bootstrap 5, Node.js
- Frontend development using React JS. Styled using Bootstrap 5 and used some npm packages such as Infinite scroll to add the infinite scroll functionality.
- This project is complete but couldn't deploy due to api limitations.

[LINK] **Weather.dev - Real time weather at your fingertips**
 Tech Stack: HTML, CSS, JavaScript
- Weather app built using html, css, javascript. This app fetches the weather of a location using weather api.
- It will show the weather of the user's actual location by using the geolocation method provided by javascript.
- You can search for a location.
- Shows the aqi and wind speed.

EDUCATION:

BRAINWARE UNIVERSITY, BARASAT | Bachelor's Degree in Computer Applications | Aug '21 - Aug '24
